CONTENTS

NUMBER 1

Regular Papers

G. Lammel, E. Brüggemann, T. Gnauk, K. Müller, C. Neusüss and A. Röhrl — 1 — A new method to study aerosol source contributions along the tracks of air parcels and its application to the near-ground level aerosol chemical composition in central Europe

C. F. Clement — 27 — Mean field theory for condensation on aerosols and application to multi-component organic vapours

T. Anttila and V.-M. Kerminen — 41 — Condensational growth of atmospheric nuclei by organic vapours

R. E. Speer, E. O. Edney and T. E. Kleindienst — 63 — Impact of organic compounds on the concentrations of liquid water in ambient $PM_{2.5}$

J. Fernández de la Mora, L. de Juan, K. Liedtke and A. Schmidt-Ott — 79 — Mass and size determination of nanometer particles by means of mobility analysis and focused impaction

F. Yan, B. Farouk and F. Ko — 99 — Numerical modeling of an electrostatically driven liquid meniscus in the cone–jet mode

A. Maisels, F. Jordan and H. Fissan — 117 — On the effect of charge recombination on the aerosol charge distribution in photocharging systems

NUMBER 2

Regular Papers

R. Przekop, A. Moskal and L. Gradoń — 133 — Lattice-Boltzmann approach for description of the structure of deposited particulate matter in fibrous filters

N. Settumba and S. C. Garrick — 149 — Direct numerical simulation of nanoparticle coagulation in a temporal mixing layer via a moment method

Y. Efendiev and M. R. Zachariah — 169 Hierarchical hybrid Monte-Carlo method for simulation of two-component aerosol nucleation, coagulation and phase segregation

R. McGraw and D. L. Wright — 189 Chemically resolved aerosol dynamics for internal mixtures by the quadrature method of moments

J.-W. Lee, M.-Y. Yi and S.-M. Lee — 211 Inertial focusing of particles with an aerodynamic lens in the atmospheric pressure range

B. Sierau, F. Stratmann, M. Pelzing, C. Neusüß, D. Hofmann and M. Wilck — 225 A condensation-growth and impaction method for rapid off-line chemical-characterization of organic submicrometer atmospheric aerosol particles

A. D'Alessandro, F. Lucarelli, P. A. Mandò, G. Marcazzan, S. Nava, P. Prati, G. Valli, R. Vecchi and A. Zucchiatti — 243 Hourly elemental composition and sources identification of fine and coarse PM10 particulate matter in four Italian towns

NUMBER 3

Regular Papers

W. Theerachaisupakij, S. Matsusaka, Y. Akashi and H. Masuda — 261 Reentrainment of deposited particles by drag and aerosol collision

S. Froeschke, S. Kohler, A. P. Weber and G. Kasper — 275 Impact fragmentation of nanoparticle agglomerates

S. B. Kwon, K. S. Lim, J. S. Jung, G. N. Bae and K. W. Lee — 289 Design and calibration of a 5-stage cascade impactor (K-JIST cascade impactor)

V. Agranovski, Z. Ristovski, M. Hargreaves, P. J. Blackall and L. Morawska — 301 Real-time measurement of bacterial aerosols with the UVAPS: performance evaluation

R. Vogt, U. Kirchner, V. Scheer, K. P. Hinz, A. Trimborn and B. Spengler — 319 Identification of diesel exhaust particles at an Autobahn, urban and rural location using single-particle mass spectrometry

B. Schwade and P. Roth 339 Simulation of nano-particle formation in a wall-heated aerosol reactor including coalescence

T. Petelski 359 Marine aerosol fluxes over open sea calculated from vertical concentration gradients

News Item

373 The 1st Czech–Finnish symposium on aerosols

I List of reviewers

NUMBER 4

Regular Papers

A. A. Onischuk, S. di Stasio, V. V. Karasev, A. M. Baklanov, G. A. Makhov, A. L. Vlasenko, A. R. Sadykova, A. V. Shipovalov and V. N. Panfilov 383 Evolution of structure and charge of soot aggregates during and after formation in a propane/air diffusion flame

C. Darquenne and G. K. Prisk 405 Effect of gravitational sedimentation on simulated aerosol dispersion in the human acinus

M. Hori, S. Ohta, N. Murao and S. Yamagata 419 Activation capability of water soluble organic substances as CCN

Y. K. Tiwari, P. C. S. Devara, P. E. Raj, R. S. Maheskumar, G. Pandithurai and K. K. Dani 449 Tropical urban aerosol distributions during pre-sunrise and post-sunset as observed with lidar and solar radiometer at Pune, India

A. S. Hasson and S. E. Paulson 459 An investigation of the relationship between gas-phase and aerosol-borne hydroperoxides in urban air

A. Ya. Bekshaev, S. M. Kontush, S. S. Rybak, G. Schweiger and C. Esen 469 Resonance penetration of gas bubbles through a thin liquid layer: a capillary resonator and its use for the generation of droplets

M. Sillanpää, R. Hillamo, T. Mäkelä, A. S. Pennanen and R. O. Salonen — 485 Field and laboratory tests of a high volume cascade impactor

Technical Note

A. K. Oskouie, K. E. Noll and H.-C. Wang — 501 Minimizing the effect of density in determination of particle aerodynamic diameter using a time of flight instrument

News Item

507 International Aerosol Fellow Award 2002 Recipients—Helmuth Horvath and Denis Boulaud

NUMBER 5

Regular Papers

C. Artelt, H.-J. Schmid and W. Peukert — 511 On the relevance of accounting for the evolution of the fractal dimension in aerosol process simulations

J. M. López-Herrera, A. Barrero, A. López, I. G. Loscertales and M. Márquez — 535 Coaxial jets generated from electrified Taylor cones. Scaling laws

B. Y. Shekunov, J. C. Feeley, A. H. L. Chow, H. H. Y. Tong and P. York — 553 Aerosolisation behaviour of micronised and supercritically-processed powders

J.-S. Lin and C.-J. Tsai — 569 Thermophoretic deposition efficiency in a cylindrical tube taking into account developing flow at the entrance region

J. Goo and C. S. Kim — 585 Theoretical analysis of particle deposition in human lungs considering stochastic variations of airway morphology

M. N. A. Karlsson and B. G. Martinsson — 603 Methods to measure and predict the transfer function size dependence of individual DMAs

T. M. Peters and D. Leith — 627 Concentration measurement and counting efficiency of the aerodynamic particle sizer 3321

Technical Note

C. van Gulijk, J. C. M. Marijnissen, M. Makkee and J. A. Moulijn — 635 Oil-soaked sintered impactors for the ELPI in diesel particulate measurements

News Item

641 The 6th aerosol conference of the Hungarian Aerosol Society (HAS) Debrecen, October 10–11 2002

NUMBER 6

Regular Papers

S. L. Clegg, J. H. Seinfeld and E. O. Edney — 667 Thermodynamic modelling of aqueous aerosols containing electrolytes and dissolved organic compounds. II. An extended Zdanovskii–Stokes–Robinson approach

S. Nijhawan, P. H. McMurry, M. T. Swihart, S.-M. Suh, S. L. Girshick, S. A. Campbell and J. E. Brockmann — 691 An experimental and numerical study of particle nucleation and growth during low-pressure thermal decomposition of silane

J. I. Jeong and M. Choi — 713 Analysis of non-spherical polydisperse particle growth in a two-dimensional tubular reactor

A. Hernandez-Sierra, F. J. Alguacil and M. Alonso — 733 Unipolar charging of nanometer aerosol particles in a corona ionizer

G. Buzorius, Ü. Rannik, E. D. Nilsson, T. Vesala and M. Kulmala — 747 Analysis of measurement techniques to determine dry deposition velocities of aerosol particles with diameters less than 100 nm

A. H. Ibrahim, P. F. Dunn and R. M. Brach — 765 Microparticle detachment from surfaces exposed to turbulent air flow: controlled experiments and modeling

A. F. Miguel 783 Effect of air humidity on the evolution of permeability and performance of a fibrous filter during loading with hygroscopic and non-hygroscopic particles

G. Pace, M. Cacciani, P. G. Calisse, A. di Sarra, G. Fiocco, D. Fuà, L. Rinaldi and S. Casadio 801 Observation of polar stratospheric clouds with the ABLE LIDAR during the APE-POLECAT flight of January 9, 1997

NUMBER 7

Regular Papers

O. Wilhelm, L. Mädler and S. E. Pratsinis 815 Electrospray evaporation and deposition

V. Devarakonda and A. K. Ray 837 Effect of inter-particle interactions on evaporation of droplets in a linear array

D. S. Kim, S. H. Park, Y. M. Song, D. H. Kim and K. W. Lee 859 Brownian coagulation of polydisperse aerosols in the transition regime

K. Nakaso, B. Han, K. H. Ahn, M. Choi and K. Okuyama 869 Synthesis of non-agglomerated nanoparticles by an electrospray assisted chemical vapor deposition (ES-CVD) method

P. Guyon, O. Boucher, B. Graham, J. Beck, O. L. Mayol-Bracero, G. C. Roberts, W. Maenhaut, P. Artaxo and M. O. Andreae 883 Refractive index of aerosol particles over the Amazon tropical forest during LBA-EUSTACH 1999

L. Jianzhong, S. Xing and Y. Zhenjiang 909 Effects of the aspect ratio on the sedimentation of a fiber in Newtonian fluids

H. Setyawan, M. Shimada, Y. Imajo, Y. Hayashi and K. Okuyama 923 Characterization of particle contamination in process steps during plasma-enhanced chemical vapor deposition operation

A. Avci and I. Karagoz 937 Effects of flow and geometrical parameters on the collection efficiency in cyclone separators

Technical Note

B. U. Lee and S. S. Kim 957 New type of impactor with a cooled impaction plate for capturing PM2.5 and other aerosols

News Item

963 "Particulate matter and health"—International Technion Symposium

NUMBER 8

Regular Papers

J. I. Jeong and M. Choi 965 A simple bimodal model for the evolution of non-spherical particles undergoing nucleation, coagulation and coalescence

T. Hakoda, H.-H. Kim, K. Okuyama and T. Kojima 977 Charged nanoparticle formation from humidified gases with and without dilute benzene under electron beam irradiation

F. Utheza and F. Garnier 993 Numerical investigation of the motion of a growing droplet in a thermal diffusion cloud chamber

A. Messerer, R. Niessner and U. Pöschl 1009 Thermophoretic deposition of soot aerosol particles under experimental conditions relevant for modern diesel engine exhaust gas systems

D. E. Evans, R. M. Harrison and J. G. Ayres 1023 The generation and characterisation of elemental carbon aerosols for human challenge studies

J. Pagels, M. Strand, J. Rissler, A. Szpila, A. Gudmundsson, M. Bohgard, L. Lillieblad, M. Sanati and E. Swietlicki 1043 Characteristics of aerosol particles formed during grate combustion of moist forest residue

M. D. Hays, N. D. Smith, J. Kinsey, Y. Dong and P. Kariher 1061 Polycyclic aromatic hydrocarbon size distributions in aerosols from appliances of residential wood combustion as determined by direct thermal desorption—GC/MS

K. S. Lim, S. B. Kwon and K. W. Lee 1085 Characteristics of the collection efficiency for a double inlet cyclone with clean air

Technical Note

B. U. Lee and S. S. Kim 1097 Sampling *E. coli* and *B. subtilis* bacteria bioaerosols by a new type of impactor with a cooled impaction plate

News Item

1101 Abstracts of the CFA 2002

NUMBER 9

A. A. Lushnikov, J. S. Bhatt and I. J. Ford 1117 Stochastic approach to chemical kinetics in ultrafine aerosols

R. S. Galeev and S. K. Zaripov 1135 A theoretical study of aerosol sampling by an idealized spherical sampler in calm air

W. C. Su and J. H. Vincent 1151 Experimental measurements of aspiration efficiency for idealized spherical aerosol samplers in calm air

H. Tanaka and K. Takeuchi 1167 Experimental transfer function for a low-pressure differential mobility analyzer by use of a monodisperse C_{60} monomer

T. Gemci, B. Shortall, G. M. Allen, T. E. Corcoran and N. Chigier 1175 A CFD study of the throat during aerosol drug delivery using heliox and air

D. Y. Lee and J. W. Lee 1193 Characteristics of particle transport in an expanding or contracting alveolated tube

C. H. Jung, Y. P. Kim and K. W. Lee 1217 A moment model for simulating raindrop scavenging of aerosols

X. Wen and S. Dunnett 1235 The aspiration efficiency of a tube sampler operating in a slow moving air stream facing vertically upwards

S. Ude and J. F. de la Mora 1245 Hypersonic impaction with molecular mass standards

F. J. Gómez-Moreno, D. Sanz-Rivera, M. Martín-Espigares, D. Papameletiou, G. De Santi and G. Kasper 1267 Characterization of particulate emissions during pyrolysis and incineration of refuse derived fuel

NUMBER 10

Regular Papers

H. Saathoff, O. Moehler, U. Schurath, S. Kamm, B. Dippel and D. Mihelcic 1277 The AIDA soot aerosol characterisation campaign 1999

H. Saathoff, K.-H. Naumann, M. Schnaiter, W. Schöck, O. Möhler, U. Schurath, E. Weingartner, M. Gysel and U. Baltensperger 1297 Coating of soot and $(NH_4)_2SO_4$ particles by ozonolysis products of α-pinene

U. Kirchner, R. Vogt, C. Natzeck and J. Goschnick 1323 Single particle MS, SNMS, SIMS, XPS, and FTIR spectroscopic analysis of soot particles during the AIDA campaign

M. Wentzel, H. Gorzawski, K.-H. Naumann, H. Saathoff and S. Weinbruch 1347 Transmission electron microscopical and aerosol dynamical characterization of soot aerosols

K.-H. Naumann 1371 COSIMA—a computer program simulating the dynamics of fractal aerosols

H. Saathoff, K.-H. Naumann, M. Schnaiter, W. Schöck, E. Weingartner, U. Baltensperger, L. Krämer, Z. Bozoki, U. Pöschl, R. Niessner and U. Schurath 1399 Carbon mass determinations during the AIDA soot aerosol campaign 1999

M. Schnaiter, H. Horvath, O. Möhler, K.-H. Naumann, H. Saathoff and O. W. Schöck 1421 UV-VIS-NIR spectral optical properties of soot and soot-containing aerosols

E. Weingartner, H. Saathoff, M. Schnaiter, N. Streit, B. Bitnar and U. Baltensperger — 1445 Absorption of light by soot particles: determination of the absorption coefficient by means of aethalometers

B. V. Kuznetsov, T. A. Rakhmanova, O. B. Popovicheva and N. K. Shonija — 1465 Water adsorption and energetic properties of spark discharge soot: Specific features of hydrophilicity

NUMBER 11

Regular Papers

G. M. Letts, P. C. Raynor and R. L. Schumann — 1481 Selecting fiber materials to improve mist filters

J. H. Ji, G. N. Bae, S. H. Kang and J. Hwang — 1493 Effect of particle loading on the collection performance of an electret cabin air filter for submicron aerosols

W. Tanthapanichakoon, K. Maneeintr, T. Charinpanitkul and C. Kanaoka — 1505 Estimation of collection efficiency enhancement factor for an electret fiber with dust load

H. Granek, J. Gras and D. Paterson — 1523 The aerosol transmission efficiency of the Cape Grim Baseline Air Pollution Station 10 m sampling inlet

K. Okada and J. Heintzenberg — 1539 Size distribution, state of mixture and morphology of urban aerosol particles at given electrical mobilities

V. N. Piskunov, A. M. Petrov and A. I. Golubev — 1555 Modeling particle formation kinetics in mixed-phase clouds

H. Horvath and M. Gangl — 1581 A low-voltage spark generator for production of carbon particles

Technical Note

B. W. LaFranchi, M. Knight and G. A. Petrucci — 1589 Leaching as a source of residual particles from nebulization of deionized water

Discussion

J. Gimbun, T. S. Y. Choong and T. G. Chuah — 1595 Comment on: "Performance of different analytical methods in evaluating grade efficiency of centrifugal separators" by Ray M. B., Hoffmann A. C. and Postma R. S. (2000) J. Aerosol Sci., 31(5), pp. 563–581

News Item

1597 The Aerosol Society. 14th Annual conference held at Reading University Programme

NUMBER 12

I. González, J. A. Gallego-Juárez and E. Riera — 1611 The influence of entrainment on acoustically induced interactions between aerosol particles—an experimental study

H. W. Kim and M. Choi — 1633 In situ line measurement of mean aggregate size and fractal dimension along the flame axis by planar laser light scattering

M. Alonso and F. J. Alguacil — 1647 The effect of ion and particle losses in a diffusion charger on reaching a stationary charge distribution

R. R. Upadhyay and O. A. Ezekoye — 1665 Evaluation of the 1-point quadrature approximation in QMOM for combined aerosol growth laws

C. T. Chang and C. J. Tsai — 1685 A model for the relative humidity effect on the readings of the PM_{10} beta-gauge monitor

M. Seipenbusch, A. P. Weber, A. Schiel and G. Kasper — 1699 Influence of the gas atmosphere on restructuring and sintering kinetics of nickel and platinum aerosol nanoparticle agglomerates

V. Agranovski, Z. Ristovski, M. Hargreaves, P. J. Blackall and L. Morawska — 1711 Performance evaluation of the UVAPS: influence of physiological age of airborne bacteria and bacterial stress

I Volume Contents and Author Index, Volume 34, 2003
